A member of the Commission ceasing to possess any of the qualifications specified in this Section or convicted of a felony while in office, shall immediately forfeit his office. All members of the Commission shall serve without compensation.

Section 1-26. Meeting of the Commission.

1. For the purposes of this Section, the following words, terms, and phrases shall have the meanings indicated herein below:

- a. Meeting means the conducting of business of a public body by a majority of its members being personally together.
- b. Regularly scheduled meeting means a meeting at which the regular business of the public body is conducted.
- c. Emergency meeting means any meeting called for the purpose of dealing with an emergency. For purposes of this act, an emergency is defined as a situation involving injury to persons or injury and damage to public or personal property or immediate financial loss when the time requirements for public notice of a special meeting would make such procedure impractical and increase the likelihood of injury or damage or immediate financial loss.
- d. Continued or reconvened meeting means a meeting which is assembled for the purpose of finishing business appearing on an agenda of a previous meeting. For the purposes of this act, only matters on the agenda for the previous meeting at which the announcement of the continuance is made may be discussed at a continued or reconvened meeting.

2. At eight p.m. on the first Monday following a regular municipal election, the Commission shall meet at the usual place for holding its meeting and the newly elected members shall, after qualifying, assume the duties of office. Thereafter the commission shall meet at such times as may be prescribed by ordinance or resolution, but not less frequently than once each month.

3. Municipal business of the City Commission shall be conducted at regularly scheduled, open and public meetings held in City Hall (or other agreed upon place which is open to the public) on the first Monday, beginning at 7:00 o'clock p.m., and the third Wednesday, beginning

at 2:00 o'clock p.m., of each month or, in the event of conflict with a holiday, on the next following day which is not a holiday, except when a special or emergency meeting is deemed necessary by the Mayor, City Commission or City Manager.

4. An agenda for each regularly scheduled meeting of the City Commission shall be prepared and shall be publicly posted in accordance with the Oklahoma Open Meeting Act (25 O.S., 1981 ss 301-314).

5. If any change in the date, time, or place of a regularly scheduled meeting is made, notice of the change shall be given to the City Clerk no less than ten (10) days prior to the implementation of such change, and the Clerk shall publicly post a notice of the change.

6. In all meetings of the City Commission, the vote of each member must be publicly cast and recorded.

7. No informal gatherings or any electronic or telephonic communications among a majority of the Commissioners shall be used to decide any action or to take any vote on any matter.

8. The Clerk shall prepare a schedule of all meetings prior to each calendar year and shall post this schedule in the City Hall prior to December 15 preceding the calendar year for which the schedule has been determined.

9. Special meetings of the Commission shall be called by the City Clerk upon the written request of the Mayor, the City Manager or two members of the Commission. Any such notice shall state the subject to be considered at the special meeting, and no other subject shall be there considered. Before the action taken at a special meeting shall be valid, the record must show the members of the Commission present, the members absent that each absent member had notice of the meeting and its purpose, and the notice itself must be spread upon the record.

- a. Special meetings shall not be held without public notice being given at least forty-eight (48) hours prior to said meeting, shall be given in writing, in person, or by telephonic means to the City Clerk.
- b. At least twenty-four (24) hours prior to the special meeting, a written public notice of the special meeting shall be prominently posted in the city hall. Such notice shall include the date, time, place, and agenda for the special meeting, and only items appearing on the agenda shall be considered at the meeting. The twenty-four (24) hours public posting shall exclude Saturdays, Sundays, and holidays legally declared by the State of Oklahoma.

10. In the event of an emergency, an emergency meeting of the City Commission may be held without public notice required. Should an emergency meeting be required, as much advance

public notice as is reasonable and possible under the circumstances existing shall be made in person or by telephonic or electronic means.

Section 1-27. Commission Rules.

The Commission shall determine its own rules and order of business and keep a journal of its proceedings. It shall have power to compel the attendance of absent members, may punish its members for disorderly behavior, and by vote of not less than four members may expel a member for disorderly conduct or violation of its rules, but no member shall be expelled unless notified of the charge against him and given an opportunity to be heard in his own defense. The rules of the Commission shall provide that citizens of the City shall have a reasonable opportunity to be heard at any open meeting of the Commission in regard to any matter considered thereat.

Section 1-28. Quorum.

A majority of the members elected to the Commission shall constitute a quorum to do business, but a less number may adjourn from time to time and compel the attendance of absent members in such manner and under such penalties as may be prescribed by ordinance. The affirmative vote of a majority of the members elected to the Commission shall be necessary to adopt any ordinance, resolution, order or vote; except that a vote to adjourn, or to compel the attendance of absent members, may be adopted by a majority of the members present. No member shall be excused from voting except on matters involving the consideration of his own official conduct or when his financial interests are involved. Upon every vote the ayes and nays shall be called and recorded, and every motion, resolution or ordinance shall be reduced to writing and read before the final vote is taken thereon. Every resolution or ordinance passed by the Commission must be signed by the Mayor or by the Mayor Pro Tem, when so acting, and be recorded and published before the same shall be in force, except as otherwise hereinafter provided.

Sections 4-24. (Reserved for future use.)

Article 3. Flood Damage Prevention

Section 4-25. Statutory Authorization and Findings of Fact.

The Legislature of the State of Oklahoma has in O.S. 82 §1601-1619 Chapter 23 delegated the responsibility of local governmental units to adopt regulations designed to minimize flood losses. Therefore, the City Commission of Elk City, Oklahoma, does ordain as follows:

1. The flood hazard areas of the City of Elk City are subject to periodic inundation, which results in loss of life and property, health and safety hazards, disruption of commerce and governmental services, and extraordinary public expenditures for flood protection and relief, all of which adversely affect the public health, safety and general welfare.
2. These flood losses are created by the cumulative effect of obstructions in floodplains which cause an increase in flood heights and velocities, and by the occupancy of flood hazards areas by uses vulnerable to floods and hazardous to other lands because they are inadequately elevated, flood proofed or otherwise protected from flood damage.

Section 4-26. Statement of Purpose.

It is the purpose of this ordinance to promote the public health, safety and general welfare and to minimize public and private losses due to flood conditions in specific areas by provisions designed to:

1. Protect human life and health;
2. Minimize expenditure of public money for costly flood control projects;
3. Minimize the need for rescue and relief efforts associated with flooding and generally undertaken at the expense of the general public;
4. Minimize prolonged business interruptions;

5. Minimize damage to public facilities and utilities such as water and gas mains, electric, telephone and sewer lines, streets and bridges located in floodplains;
6. Help maintain a stable tax base by providing for the sound use and development of flood-prone areas in such a manner as to minimize future flood blight areas; and
7. Insure that potential buyers are notified that property is in a flood area.

Section 4-27. Methods of Reducing Flood Losses.

In order to accomplish its purposes, this ordinance uses the following methods:

1. Restrict or prohibit uses that are dangerous to health, safety or property in times of flood, or cause excessive increases in flood heights or velocities;
2. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;
3. Control the alteration of natural floodplains, stream channels, and natural protective barriers, which are involved in the accommodation of flood waters;
4. Control filling, grading, dredging and other development which may increase flood damage;
5. Prevent or regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands.

Section 4-28. Definitions.

Unless specifically defined below, words or phrases used in this ordinance shall be interpreted to give them the meaning they have in common usage and to give this ordinance it's most reasonable application.

Alluvial Fan Flooding - means flooding occurring on the surface of an alluvial fan or similar landform which originates at the apex and is characterized by high-velocity flows; active processes of erosion, sediment transport, and deposition; and unpredictable flow paths.

Apex - means a point on an alluvial fan or similar landform below which the flow path of the major stream that formed the fan becomes unpredictable and alluvial fan flooding can occur.

Area of Shallow Flooding - means a designated AO, AH, or VO zone on a community's Flood Insurance Rate Map (FIRM) with a one percent chance or greater annual chance of flooding to an average depth of one to three feet where a clearly defined channel does not exist,

where the path of flooding is unpredictable and where velocity flow may be evident. Such flooding is characterized by ponding or sheet flow.

Area of Special Flood Hazard - is the land in the floodplain within a community subject to a one percent or greater chance of flooding in any given year. The area may be designated as Zone A on the Flood Hazard Boundary Map (FHBM). After detailed ratemaking has been completed in preparation for publication of the FIRM, Zone A usually is refined into Zones A, AE, AH, AO, A1-99, VO, V1-30, VE or V.

Base Flood - means the flood having a one percent chance of being equaled or exceeded in any given year.

Basement - means any area of the building having its floor sub-grade (below ground level) on all sides.

Critical Feature - means an integral and readily identifiable part of a flood protection system, without which the flood protection provided by the entire system would be compromised.

Development - means any man-made change in improved and unimproved real estate, including but not limited to buildings or other structures, mining, dredging, filling, grading, paving, excavation or drilling operations or storage of equipment or materials.

Elevated Building - means a non-basement building (i) built, in the case of a building in Zones A1-30, AE, A, A99, AO, AH, B, C, X, and D, to have the top of the elevated floor, or in the case of a building in Zones V1-30, VE, or V, to have the bottom of the lowest horizontal structure member of the elevated floor elevated above the ground level by means of pilings, columns (posts and piers), or shear walls parallel to the floor of the water and (ii) adequately anchored so as not to impair the structural integrity of the building during a flood of up to the magnitude of the base flood. In the case of Zones A1-30, AE, A, A99, AO, AH, B, C, X, and D, "elevated building" also includes a building elevated by means of fill or solid foundation perimeter walls with openings sufficient to facilitate the unimpeded movement of flood waters. In the case of Zones V1-30, VE, or V, "elevated building" also includes a building otherwise meeting the definition of "elevated building," even though the lower area is enclosed by means of breakaway walls if the breakaway walls met the standards of Section 60.3(e)(5) of the National Flood Insurance Program regulations.

Existing Construction - means for the purposes of determining rates, structures for which the "start of construction" commenced before the effective date of the FIRM or before January 1, 1975, for FIRMs effective before that date. "Existing construction" may also be referred to as "existing structures."

Existing Manufactured Home Park or Subdivision - means a manufactured home park or subdivision for which the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including, at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is completed

before the effective date of the floodplain management regulations adopted by a community.

Expansion to an Existing Manufactured Home Park or Subdivision - means the preparation of additional sites by the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads).

Flood or Flooding - means a general and temporary condition of partial or complete inundation of normally dry land areas from:

- (i.) The overflow of inland or tidal waters.
- (ii.) The unusual and rapid accumulation or runoff of surface waters from any source.

Flood Insurance Rate Map (FIRM) - means an official map of a community, on which the Federal Emergency Management Agency has delineated both the areas of special flood hazards and the risk premium zones applicable to the community.

Flood Insurance Study - is the official report provided by the Federal Emergency Management Agency. The report contains flood profiles, water surface elevation of the base flood, as well as the Flood Boundary-Floodway Map.

Floodplain or Flood-Prone Area - means any land area susceptible to being inundated by water from any source (see definition of flooding).

Floodplain Management - means the operation of an overall program of corrective and preventive measures for reducing flood damage, including but not limited to emergency preparedness plans, flood control works and floodplain management regulations.

Floodplain Management Regulations - means zoning ordinances, subdivision regulations, building codes, health regulations, special purpose ordinances (such as a floodplain ordinance, grading ordinance and erosion control ordinance) and other applications of police power. The term describes such state or local regulations, in any combination thereof, which provide standards for the purpose of flood damage prevention and reduction.

Flood Protection System - means those physical structural works for which funds have been authorized, appropriated, and expended and which have been constructed specifically to modify flooding in order to reduce the extent of the areas within a community subject to a "special flood hazard" and the extent of the depths of associated flooding. Such a system typically includes hurricane tidal barriers, dams, reservoirs, levees or dikes. These specialized flood modifying works are those constructed in conformance with sound engineering standards.

Flood Proofing - means any combination of structural and non-structural additions,

changes, or adjustments to structures which reduce or eliminate flood damage to real estate or improved real property, water and sanitary facilities, structures and their contents.

Floodway (Regulatory Floodway) - means the channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than a designated height.

Functionally Dependent Use - means a use, which cannot perform its intended purpose unless it is located or carried out in close proximity to water. The term includes only docking facilities, port facilities that are necessary for the loading and unloading of cargo or passengers, and ship building and ship repair facilities, but does not include long-term storage or related manufacturing facilities.

Highest Adjacent Grade - means the highest natural elevation of the ground surface prior to construction next to the proposed walls of a structure.

4. Individually listed on a local inventory or historic places in communities with historic preservation programs that have been certified either:
 - a) By an approved state program as determined by the Secretary of the Interior or;
 - b) Directly by the Secretary of the Interior in states without approved programs.

Levee - means a man-made structure, usually an earthen embankment, designed and constructed in accordance with sound engineering practices to contain, control, or divert the flow

of water so as to provide protection from temporary flooding.

Levee System - means a flood protection system, which consists of a levee, or levees, and associated structures, such as closure, and drainage devices, which are constructed and operated in accordance with sound engineering practices.

Lowest Floor - means the lowest floor of the lowest enclosed area (including basement). An unfinished or flood resistant enclosure, usable solely for parking or vehicles, building access or storage in an area other than a basement area is not considered a building's lowest floor; provided that such enclosure is not built so as to render the structure in violation of the applicable non-elevation design requirement of Section 60.3 of the National Flood Insurance Program regulations.

Manufactured Home - means a structure transportable in one or more sections, which is built on a permanent chassis and is designed for use with or without a permanent foundation when connected to the required utilities. The term "manufactured home" does not include a "recreational vehicle".

Manufactured Home Park or Subdivision - means a parcel (or contiguous parcels) of land divided into two or more manufactured home lots for rent or sale.

For floodplain management purposes, "new construction" means structures for which the "start of construction" commenced on or after the effective date of a floodplain management regulation adopted by a community and includes any subsequent improvements to such structures.

New Manufactured Home Park or Subdivision - means a manufactured home park or subdivision for which the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is completed on or after the effective date of floodplain management regulations adopted by a community.

Recreational Vehicle - means a vehicle which is:

1. Built on a single chassis;
2. 400 square feet or less when measured at the largest horizontal projections;
3. Designed to be self-propelled or permanently towable by a light duty truck; and
4. Designed primarily not for use as a permanent dwelling but as temporary living

quarters for recreational, camping, travel, or seasonal use

Start of Construction - (for other than new construction or substantial improvements under the Coastal Barrier Resources Act (Pub. L. 97-348)), includes substantial improvement and means the date the building permit was issued, provided the actual start of construction, repair, reconstruction, rehabilitation, addition, placement, or other improvement was within 180 days of the permit date. The actual start means either the first placement of permanent construction of a structure on a site, such as the pouring of slab or footings, the installation of piles, the construction of columns, or any work beyond the stage of excavation; or the placement of a manufactured home on a foundation. Permanent construction does not include land preparation, such as clearing, grading and filling; nor does it include the installation of streets and/or walkways; nor does it include excavation for basement, footings, piers or foundations or the erection of temporary forms; nor does it include the installation on the property of accessory buildings, such as garages or sheds not occupied as dwelling units or not part of the main structure. For a substantial improvement, the actual start of construction means the first alteration of any wall, ceiling, floor, or other structural part of a building, whether or not that alteration affects the external dimensions of the building.

Structure - means a walled and roofed building, including a gas or liquid storage tank that is principally above ground, as well as a manufactured home.

Substantial Damage - means damage of any origin sustained by a structure whereby the cost of restoring the structure to it before damaged condition would equal or exceed 50 percent of the market value of the structure before the damage occurred.

Substantial Improvement - means any reconstruction, rehabilitation, addition, or other improvement of a structure, the cost of which equals or exceeds 50 percent of the market value of the structure before "start of construction" of the improvement. This includes structures, which have incurred "substantial damage", regardless of the actual repair work performed. The term does not, however, include either:

1. Any project for improvement of a structure to correct existing violations of state or local health, sanitary, or safety code specifications which have been identified by the local code enforcement official and which are the minimum necessary conditions or
2. Any alteration of a "historic structure" provided that the alteration would not preclude the structure's continued designation as a "historic structure."

Variance - is a grant of relief to a person from the requirement of this ordinance when specific enforcement would result in unnecessary hardship. A variance, therefore, permits construction or development in a manner otherwise prohibited by this ordinance. (For full requirements see Section 60.6 of the National Flood Insurance Program regulations.)

Violation - means the failure of a structure or other development to be fully compliant with the community's floodplain management regulations. A structure or other development

without the elevation certificate, other certifications, or other evidence of compliance required in Section 60.3(b)(5), (c)(4), (c)(10), (d)(3), (e)(2), (e)(4), or (e)(5) is presumed to be in violation until such time as that documentation is provided.

Water Surface Elevation - means the height, in relation to the National Geodetic Vertical Datum (NGVD) of 1929 (or other datum, where specified), of floods of various magnitudes and frequencies in the floodplains of coastal or riverine areas.

Section 4-29. Lands to which this Ordinance Applies.

The ordinance shall apply to all areas of special flood hazard with the jurisdiction of Elk City, Oklahoma.

Section 4-30. Basis for Establishing the Areas of Special Flood Hazard.

The areas of special flood hazard identified by the Federal Emergency Management Agency in a scientific and engineering report entitled, "The Flood Insurance Study for the City of Elk City", dated December 16, 2003, with accompanying Flood Insurance Rate Maps (FIRM) are hereby adopted by reference and declared to be a part of this ordinance.

Section 4-31. Establishment of Development Permit.

A Development Permit shall be required to ensure conformance with the provisions of this ordinance.

Section 4-32. Compliance.

No structure or land shall hereafter be located, altered, or have its use changed without full compliance with the terms of this ordinance and other applicable regulations.

Section 4-33. Abrogation and Greater Restrictions.

This ordinance is not intended to repeal, abrogate, or impair any existing easements, covenants, or deed restrictions. However, where this ordinance and another ordinance, easement, covenant, or deed restriction conflict or overlap, whichever imposes the more stringent restrictions shall prevail.

Section 4-34. Interpretation.

In the interpretation and application of this ordinance, all provisions shall be; (1) considered

as minimum requirements; (2) liberally construed in favor of the governing body; and (3) deemed neither to limit nor repeal any other powers granted under State Statutes.

Section 4-35. Warning and Disclaimer or Liability.

The degree of flood protection required by this ordinance is considered reasonable for regulatory purposes and is based on scientific and engineering considerations. On rare occasions greater floods can and will occur and flood heights may be increased by man-made or natural causes. This ordinance does not imply that land outside the areas of special flood hazards or uses permitted within such areas will be free from flooding or flood damages. This ordinance shall not create liability on the part of the community or any official or employee thereof for any flood damages that result from reliance on this ordinance or any administrative decision lawfully made hereunder.

Section 4-36. Designation of the Flood Plain Administrator

The City Manager is hereby appointed the Floodplain Administrator to administer and implement the provisions of this ordinance and other appropriate sections of 44 CFR (National Flood Insurance Program Regulations) pertaining to floodplain management.

Section 4-37. Duties and Responsibilities of the Flood Plain Administrator.

Duties and responsibilities of the Floodplain Administrator shall include, but not be limited to, the following:

1. Maintain and hold open for public inspection all records pertaining to the provisions of this ordinance.
2. Review permit application to determine whether proposed building site, including the placement of manufactured homes, will be reasonably safe from flooding.
3. Review, approve or deny all applications for development permits required by adoption of this ordinance.
4. Review permits for proposed development to assure that all necessary permits have been obtained from those Federal, State or local governmental agencies (including Section 404 of the Federal Water Pollution Control Act Amendments of 1972, 33 U.S.C. 1334) from which prior approval are required.
5. Where interpretation is needed as to the exact location of the boundaries of the areas of special flood hazards (for example, where there appears to be a conflict between a mapped boundary and actual field conditions) the Floodplain Administrator shall make the necessary interpretation.

6. Notify, in riverine situations, adjacent communities and the State Coordinating Agency, which is the Oklahoma Water Resources Board, prior to any alteration or relocation of a watercourse, and submit evidence of such notification to the Federal Emergency Management Agency.
 7. Assure that the flood carrying capacity within the altered or relocated portion of any watercourse is maintained.
 8. When base flood elevation data has not been provided in accordance with Section 4-30, the Floodplain Administrator shall obtain, review and reasonably utilize any base flood elevation data and floodway data available from a Federal, State or other source, in order to administer the provisions of Section 4.
 9. When a regulatory floodway has not been designated, the Floodplain Administrator must require that no new construction, substantial improvements, or other development (including fill) shall be permitted within Zones A1-30 and AE on the community's FIRM, unless it is demonstrated that the cumulative effect of the proposed development, when combined with all other existing and anticipated development, will not increase the water surface elevation of the base flood more than one foot at any point within the community.
 10. Under the provisions of 44 CFR Chapter 1, Section 65.12, of the National Flood Insurance Program regulations, a community may approve certain development in Zones A1-30, AE, AH, on the community's FIRM which increases the surface elevation of the base flood by more than one foot, provided that the community first applies for a conditional FIRM revision through FEMA (Conditional Letter of Map Revision).

Section 4-38. Permit Procedures.

1. Application for a Development Permit shall be presented to the Floodplain Administrator on forms furnished by him/her and may include, but not be limited to, plans in duplicate drawn to scale showing the location, dimensions, and elevation of proposed landscape alterations, existing and proposed structures, including the placement of manufactured homes, and the location of the foregoing in relation to areas of special flood hazard. Additionally, the following information is required:

- a. Elevation (in relation to mean sea level) of the lowest floor (including basement) of all new and substantially improved structures.
- b. Elevation (in relation to mean sea level) to which any nonresidential structure shall be flood proofed;
- c. A certificate from a registered professional engineer or architect that the nonresidential flood proofed structure shall meet the flood proofing

criteria of Section 4-41 (2);

- d. Description of the extent to which any watercourse or natural drainage will be altered or relocated as a result of proposed development.
- e. Maintain a record of all such information in accordance with Section 4-37 (1).

2. Approval or denial of a Development Permit by the Floodplain Administrator shall be based on all of the provisions of this ordinance and the following relevant factors:

- a. The danger to life and property due to flooding or erosion damage;
- b. The susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owner;
- c. The danger that materials may be swept onto other lands to the injury of others;
- d. The compatibility of the proposed use with existing and anticipated development;
- e. The safety of access to the property in times of flood for ordinary and emergency vehicles;
- f. The costs of providing governmental services during and after flood conditions including maintenance and repair of streets and bridges, and public utilities and facilities such as sewer, gas, electrical and water systems;
- g. The expected heights, velocity, duration, rate of rise and sediment transport of the flood waters and the effects of wave action, if applicable, expected at the site;
- h. The necessity to the facility of a waterfront location, where applicable;
- i. The availability of alternative locations, not subject to flooding or erosion damage, for the proposed use;
- j. The relationship of the proposed use to the comprehensive plan for that area.

Section 4-39. Variance Procedures.

- 1. The appeal Board as established by the community shall hear and render

judgment on requests for variances from the requirements of this ordinance.

2. The Appeal Board shall hear and render judgment on an appeal only when it is alleged there is an error in any requirement, decision, or determination made by the Floodplain Administrator in the enforcement or administration of this ordinance.

3. Any person or persons aggrieved by the decision of the Appeal Board may appeal such decision in the courts of competent jurisdiction.

4. The Floodplain Administrator shall maintain a record of all actions involving an appeal and shall report variances to the Federal Emergency Management Agency upon request.

5. Variances may be issued for the reconstruction, rehabilitation or restoration of structures listed on the National Register of Historic Places or the State Inventory of Historic Places, without regard to the procedures set forth in the remainder of this ordinance.

6. Variances may be issued for new construction and substantial improvements to be erected on a lot of one-half acre or less in size contiguous to and surrounded by lots with existing structures constructed below the base flood level, providing the relevant factors in Section 4-38 (a) of this Article have been fully considered. As the lot size increases beyond the one-half acre, the technical justification required for issuing the variance increases.

7. Upon consideration of the factors noted above and the intent of this ordinance, the Appeal Board may attach such conditions to the granting of variances as it deems necessary to further the purpose and objectives of this ordinance (Section 4-26).

8. Variances shall not be issued within any designated floodway if any increase in flood levels during the base flood discharge would result.

9. Variances may be issued for the repair or rehabilitation of historic structures upon a determination that the proposed repair or rehabilitation will not preclude the structure's continued designation as a historic structure and the variance is the minimum necessary to preserve the historic character and design of the structure.

10. Prerequisites for granting variances:

- a. Variances shall only be issued upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief.
- b. Variances shall only be issued upon: (i) showing a good and sufficient cause; (ii) a determination that failure to grant the variance would result in exceptional hardship to the applicant, and (iii) and a determination that the granting of a variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, create nuisances, cause fraud on or victimization of the public, or conflict with existing local laws or ordinances.

- c. Any application to which a variance is granted shall be given written notice that the structure will be permitted to be built with the lowest floor elevation below the base flood elevation, and that the cost of flood insurance will be commensurate with the increased risk resulting from the reduced lowest floor elevation.

11. Variances may be issued by a community for new construction and substantial improvements and for other development necessary for the conduct of a functionally dependent use provided that: (i) the criteria outlined in Section 4-39 are met, and (ii) the structure or other development is protected by methods that minimize flood damages during the base flood and create no additional threats to public safety.

Section 4-40. General Standards for Flood Hazard Reduction

In all areas of special flood hazards the following provisions are required for all new construction and substantial improvements:

1. All new construction or substantial improvements shall be designed (or modified) and adequately anchored to prevent flotation, collapse or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy;
2. All new construction or substantial improvements shall be constructed by methods and practices that minimize flood damage;
3. All new construction or substantial improvements shall be constructed with materials resistant to flood damage;
4. All new construction or substantial improvements shall be constructed with electrical, heating, ventilation, plumbing, and air conditioning equipment and other service facilities that are designed and/or located so as to prevent water from entering or accumulating within the components during conditions of flooding.
5. All new and replacement water supply systems shall be designed to minimize or eliminate infiltration of flood waters into the system;
6. New and replacement sanitary sewage systems shall be designed to minimize or eliminate infiltration of flood waters into the system and discharge from the systems into flood waters; and,
7. On-site waste disposal systems shall be located to avoid impairment to them or contamination from them during flooding.

Section 4-41. Specific Standards.

In all areas of special flood hazards where base flood elevation data has been provided as set forth in (i) Section 4-30, (ii) Section 4-37, or (iii) Section 4-42, sub. 4, the following provisions are required:

1. Residential Construction - new construction and substantial improvement of any residential structure shall have the lowest floor (including basement), elevated two (2) feet above the base flood elevation. A registered professional engineer, architect, or land surveyor shall submit a certification to the Floodplain Administrator that the standard of this subsection as proposed in Section 4-38 (1) 1, is satisfied.

2. Nonresidential Construction - new construction and substantial improvements of any commercial, industrial or other nonresidential structure shall have the lowest floor (including basement) elevated two (2) feet above the base flood level.

3. Enclosures - new construction and substantial improvements, with fully enclosed areas below the lowest floor that are usable solely for parking of vehicles, building access or storage in an area other than a basement and which are subject to flooding shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwaters. Designs for meeting this requirement must either be certified by a registered professional engineer or architect or meet or exceed the following minimum criteria:

- a. A minimum of two openings having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding shall be provided.
- b. The bottom of all openings shall be no higher than one foot above grade.
- c. Openings may be equipped with screens, louvers, valves, or other coverings or devices provided that they permit the automatic entry and exit of floodwaters.

4. Manufactured Homes -

- a. Require that all manufactured homes to be placed within Zone A on the Elk City FIRM shall be installed using methods and practices, which minimize flood damage. For the purposes of this requirement, manufactured homes must be elevated and anchored to resist flotation, collapse, or lateral movement. Methods of anchoring may include, but are not limited to, use of over-the-top or frame ties to ground anchors. This requirement is in addition to applicable State and local anchoring requirements for resisting wind forces.
- b. Require that manufactured homes that are placed or substantially

improved within Zones A1-30, AH, and AE on the community's FIRM on sites (i) outside of a manufactured home park or subdivision, (ii) in a new manufactured home park or subdivision, (iii) in an expansion to an existing manufactured home park or subdivision, or (iv) in an existing manufactured home park or subdivision on which a manufactured home has incurred "substantial damage" as a result of a flood, be elevated on a permanent foundation such that the lowest floor of the manufactured home is elevated two feet (2) above the base flood elevation and be securely anchored to an adequately anchored foundation system to resist flotation, collapse, and lateral movement.

- c. Require that manufactured homes be placed or substantially improved on sites in an existing manufactured home park or subdivision with Zones A1-30, AH and AE on the community's FIRM that are not subject to the provisions of paragraph (4) of this section be elevated so that the lowest floor of the manufactured home is two (2) feet above the base flood elevation, is supported by reinforced piers or other foundation elements of at least equivalent strength and is securely anchored to an adequately anchored foundation system to resist flotation, collapse, and lateral movement.

4. Recreational Vehicles - Require that recreational vehicles placed on sites within Zones A1-30, AH, and AE on the community's FIRM either:

- a. Be on the site for fewer than 180 consecutive days,
- b. Be fully licensed and ready for highway use, or
- c. Meet the permit requirements of Section 4-38 (a), and the elevation and anchoring requirements for "manufactured homes" in paragraph (4) of this section. A recreational vehicle is ready for highway use if it is on its wheels or jacking system, is attached to the site only by quick disconnect type utilities and security devices, and has no permanently attached additions.

Section 4-42. Standards for Subdivision Proposals.

1. All subdivision proposals including the placement of manufactured home parks and subdivisions shall be consistent with Sections 4-25, 4-26, and 4-27 of this ordinance.

2. All proposals for the development of subdivisions including the placement of manufactured home parks and subdivisions shall meet Development Permit requirements of Section 4-31 ; Section 4-38; and the provisions of Section 4-40 of this ordinance.

3. Base flood elevation data shall be generated for subdivision proposals and other

proposed development including the placement of manufactured home parks and subdivisions which is greater than 50 lots or 5 acres, whichever is lesser, if not otherwise provided pursuant to Section 4-30 or Section 4-37 (8) of this ordinance.

4. All subdivision proposals including the placement of manufactured home parks and subdivisions shall have adequate drainage provided to reduce exposure to flood hazards.

5. All subdivision proposals including the placement of manufactured home parks and subdivisions shall have public utilities and facilities such as sewer, gas, electrical and water systems located and constructed to minimize or eliminate flood damage.

Section 4-43. Flood-Prone Areas.

Located within the areas of special flood hazard established in Section 4-30, are areas designated as shallow flooding. These areas have special flood hazards associated with base flood depths of 1 to 3 feet where a clearly defined channel does not exist and where the path of flooding is unpredictable and where velocity flows may be evident. Such flooding is characterized by ponding or sheet flow; therefore, the following provisions apply:

1. All new construction and substantial improvements of residential structures have the lowest floor (including basement) elevated above the highest adjacent grade at least as high as the depth number specified in feet on the community's FIRM (at least two feet if no depth number is specified).
2. All new construction and substantial improvements of non-residential structures together with attendant utility facilities have the lowest floor (including basement) elevated above the highest adjacent grade at least as high as the depth number specified in feet on the community's FIRM (at least two feet above if no depth number is specified).
3. A registered professional engineer or architect shall submit a certification to the Floodplain Administrator that the standards of this Section, as proposed in Section 4-38 (1) a., are satisfied.
4. Require within Zones AH or AO adequate drainage paths around structures on slopes, to guide floodwaters around and away from proposed structures.

Section 4-44. Floodways.

Floodways - located within areas of special flood hazard established in Section 4-30, are areas designated as floodways. Since the floodway is an extremely hazardous area due to the velocity of floodwaters, which carry debris, potential projectiles and erosion potential, the

following provisions shall apply:

1. Encroachments are prohibited, including fill, new construction, substantial improvements and other development within the adopted regulatory floodway unless it has been demonstrated through hydrologic and hydraulic analyses performed in accordance with standard engineering practice that the proposed encroachment would not result in any increase in flood levels within the community during the occurrence of the base flood discharge.
2. If Section 4-44 (1) above is satisfied, all new construction and substantial improvements shall comply with all applicable flood hazard reduction provisions of Section 4-40.
3. Under the provisions of 44 CFR Chapter 1, Section 65.12, of the National Flood Insurance Regulations, a community may permit encroachments within the adopted regulatory floodway that would result in an increase in base flood elevations, provided that the community first applies for a conditional FIRM and floodway revision through FEMA.

Section 4-45. Penalties for Noncompliance.

No structure or land shall hereafter be constructed, located, extended, converted, or altered without full compliance with the terms of this ordinance and other applicable regulations. Violation of the provisions of this ordinance by failure to comply with any of its requirements (including violations of conditions and safeguards established in connection with conditions) shall constitute a misdemeanor. Any person who violates this ordinance or fails to comply with any of its requirements shall upon conviction thereof be fined not more than \$ 200.00 or imprisoned for not more than 30 days, or both, for each violation, and in addition shall pay all costs and expenses involved in the case. Nothing herein contained shall prevent the City of Elk City from taking such other lawful action as is necessary to prevent or remedy any violation.

Such notice may be published once, not less than ten (10) days prior to any hearing or action by the City Commission;

- b. A hearing shall be held by the City Commission to determine if the property is dilapidated and has become detrimental to the health, safety, or welfare of the general public and the community, or if the property creates a fire hazard which is dangerous to other property;
- c. Pursuant to a finding that the condition of the property constitutes a detriment or a hazard and that the property would be benefited by the removal of such conditions, the City Commission may cause the dilapidated building to be torn down and removed. the City Commission shall fix reasonable dates for the commencement and completion of the work. The City Clerk shall immediately file a notice of dilapidation and lien with the County Clerk describing the property, the findings of the City at the hearing, and stating that the City claims a lien on the property for the destruction and removal costs and that such costs are the personal obligation of the property owner from and after the date of filing of said notice. The agents of the City are granted the right of entry on the property for the performance of the necessary duties as a governmental function of the City if the work is not performed by the property owner with dates fixed by the City Commission.

2. The City Commission shall determine the actual cost of the dismantling and removal of dilapidated buildings and other expenses that may be necessary in conjunction with the dismantling and removal of the buildings, including the cost of notice and mailing. In addition, a copy of the statement shall be mailed to any mortgage holder at the address provided for in subparagraph 1(a) of this Section. At the time of mailing of the statement of costs to any property owner or mortgage holder, the City shall obtain a receipt of mailing from the postal service, which receipt shall indicate the date of mailing and the name and address of the mailee. If the City dismantles or removes any dilapidated buildings, the cost to the property owner shall not exceed the actual cost of the labor, maintenance, and equipment required for the dismantling and removal of the dilapidated buildings. If dismantling and removal of the dilapidated buildings is done on a private contract basis, the contract shall be awarded to the lowest and best bidder.

3. When payment is made to the City for cost incurred, the City Clerk shall file a release of lien, but if payment attributable to actual cost of the dismantling and removal of the buildings is not made within six (6) months from the date of mailing of the statement to the owner of such property, the City Clerk shall forward a certified statement of the amount of the cost to the

County Treasurer of the county in which the property is located. The costs shall be levied on the property and collected by the County Treasurer as are other taxes authorized by law. In addition, the cost and the interest thereon shall be a lien against the property from the date the notice of the lien is filed with the County Clerk. The lien shall be coequal with the lien of ad valorem taxes and all other taxes and special assessments and shall be prior and superior to all other titles and liens against the property. The lien shall continue until the cost is fully paid. At any time prior to collecting provided for in this paragraph, the City may pursue any civil remedy for collection of the amount owing and interest thereon including an action in personam against the property owner and an action in rem to foreclose its lien against the property. A mineral interest, if severed from the surface interest and not owned by the surface owner, shall not be subject to any tax or judgment lien created pursuant to this Section. Upon receiving payment, the City Clerk shall forward to the County Treasurer a notice of such payment and shall direct discharge of the lien.

4. The City Manager of the City of Elk City is hereby designated as the administrative officer to carry out the duties of the City Commission specified in Section 14-12 of the Code of Ordinances of the City of Elk City, Oklahoma, pertaining to dilapidated building complaints. The property owner shall have the right of appeal to the City Commission from any order of the administrative officer or administrative body. "Owner" means the owner of record as shown by the most current tax rolls of the County Treasurer.

6. Nothing in the provisions of this section shall prevent the City from abating a dilapidated building as a nuisance or otherwise exercising its police power to protect the health, safety, or welfare of the general public.

7. The officers, employees or agents of the City shall not be liable for any damages or loss of property due to the removal of dilapidated buildings performed pursuant to the provisions of this Section or as otherwise prescribed by law.

8. The provisions of this act shall not apply to any property zoned and used for agricultural purposes.

9. After a building has been declared dilapidated, as provided in this Section, and before the commencement of the tearing and removal of a dilapidated building, the City Commission may authorize that such a building be boarded and secured.

11. The City Commission may cause an unsecured building to be boarded and secured in accordance with the following procedures:

12. Before the City Commission orders such action, at least ten (10) days' notice that such unsecured building is to be boarded and secured shall be given by mail to any property owners and mortgage holders as provided in sub-paragraph 1(a) of this Section. At the time of mailing of notice to any property owner or mortgage holder, the City shall obtain a receipt of mailing from the postal service, which receipt shall indicate the date of mailing and the name and address of the mailer. However, if neither the property owner nor the mortgage holder can be located, notice may be given by posting a copy of the notice on the property or by publication. Such notice shall be published one time, not less than ten (10) days prior to any hearing or action by the City pursuant to the provisions of this Section. If the City Commission anticipates summary abatement of a nuisance in accordance with the provisions of sub-paragraph 21 of this Section, the notice shall state: that any subsequent need for boarding and securing the building within a six-month period after the initial boarding and securing of the building pursuant to such notice may be summarily boarded and secured by the City Commission; that the costs of such boarding and securing shall be assessed against the owner; and that a lien may be imposed on the property to secure such payment; all without further prior notice to the property owner or mortgage holder.

13. The owner of the property may give his written consent to the City authorizing the boarding and securing of such unsecured building and to the payment of any costs incurred thereby. By giving said written consent, the owner waives his right to a hearing by the City Commission.

14. If the property owner does not give his written consent to such actions, a hearing may be held by the City Commission to determine whether the boarding and securing of such unsecured building would promote and benefit the public health, safety or welfare. Such hearing may be held in conjunction with a hearing on the accumulation of trash or the growth of weeds or grass on the premises of such unsecured building held pursuant to the provisions of this Chapter. In making such determination, the City Commission shall apply the following standard: the City Commission may order the boarding and securing of the unsecured building when the boarding and securing thereof would make such building less available for transient occupation, decrease a fire hazard created by such building, or decrease the hazard that such building would constitute an attractive nuisance to children. Upon making the required determination, the City Commission may order the boarding and securing of the unsecured building.

15. After the City Commission orders the boarding and securing of such unsecured building, the City Clerk shall immediately file a notice of unsecured building and lien with the County Clerk describing the property, stating the findings of the City Commission at the hearing at which such building was determined to be unsecured, and stating that the City claims a lien on said property for the costs of boarding and securing such building and that such costs are the personal obligation of the property owner from and after the date of filing said notice.

16. Pursuant to the order of the City Commission, the agents of the City are granted the right of entry on the property for the performance of the boarding and securing of such building and for the performance of all necessary duties as a governmental function of the City.

17. After an unsecured building has been boarded and secured, the City Commission shall determine the actual costs of such actions and any other expenses that may be necessary in conjunction therewith including the cost of the notice and mailing. The City Clerk shall forward a statement of the actual costs attributable to the boarding and securing of the unsecured building and a demand for payment of such costs, by mail to any property owners and mortgage holders as provided in sub-paragraph 1(a) of this Section. At the time of mailing of the statement of costs to any property owner or mortgage holder, the City shall obtain a receipt of mailing from the postal service, which receipt shall indicate the date of mailing and the name and address of the mailer.

18. If the City boards and secures any unsecured building, the cost to the property owner shall not exceed the actual cost of the labor, materials and equipment required for the performance of such actions. If such actions are done on a private contract basis, the contract shall be awarded to the lowest and best bidder.

19. When payment is made to the City for costs incurred, the City Clerk shall file a release of lien, but if payment attributable to the actual costs of the boarding and securing of the unsecured building is not made within thirty (30) days from the date of mailing of the statement to the owner of such property, the City Clerk shall forward a certified statement of the amount of the costs to the County Treasurer of the county. Said costs shall be levied on the property and collected by the County Treasurer as are other taxes authorized by law. Until fully paid, the costs and the interest thereon shall be the personal obligation of the property owner from and after the date the notice of unsecured building and lien is filed with the County Clerk. In addition, the costs and the interest thereon shall be a lien against the property from the date the notice of the lien is filed with the County Clerk. Said lien shall be coequal with the lien of ad valorem taxes and all other taxes and special assessments and shall be prior and superior to all other titles and liens against the property. The lien shall continue until the costs and interest are fully paid. At any time prior to collection as provided for in this sub-paragraph, the City may pursue any civil remedy for collection of the amount owing and interest thereon, including an action in personam against the property owner and an action in rem to foreclose its lien against the property. A mineral interest if severed from the surface owner shall not be subject to any tax or judgment lien created pursuant to this Section. Upon receiving payment, the City Clerk shall forward to the County Treasurer a notice of such payment and shall direct discharge of the lien.

20. The City Manager of the City of Elk City is hereby designated as the administrative officer to carry out the duties of the City Commission specified in Section 14-13, 14-14, 14-15, and 14-16 of the Code of Ordinances of the City of Elk City, Oklahoma, pertaining to weeds and trash complaints. The property owner or mortgage holder shall have a right of appeal to the City Commission from any order of the administrative officer or administrative body. Such appeal shall be taken by filing written notice of appeal with the City Clerk within ten (10) days after the administrative order is rendered.

21. If the City Commission causes a structure within the city limits to be boarded and secured, any subsequent need for boarding and securing within a six-month period constitutes a public nuisance and may be summarily boarded and secured without further prior notice to the property owner or mortgage holder. At the time of each such summary boarding and securing, the City shall notify the property owner and mortgage holder of the boarding and securing and the costs thereof. The notice shall state that the property owner may request an appeal with the City Clerk within ten (10) days after the mailing of the notice. The notice and hearing shall be as provided for in sub-paragraph 12 of this Section. Unless otherwise determined at the hearing the cost of such boarding and securing shall be determined and collected as provided for in sub-paragraph 17, 18 and 19 of this Section.

If the City Commission anticipates summary abatement of a nuisance in accordance with the provisions of Section 14-18, herein, the notice, whether by certified mail, posting or publication, shall state: that any accumulations of trash or excessive weed or grass growth on the owner's property occurring within six (6) months after the removal of trash or cutting or mowing of weeds or grass on the property pursuant to such notice may be summarily abated by the City Commission; that the costs of such abatement shall be assessed against the owner; and that a lien may be imposed on the property to secure such payment, all without further prior notice to the property owner;

- b. The owner of the property may give his written consent to the City authorizing the removal of the trash or the mowing of the weeds or grass. By giving said written consent, the owner waives his right to a hearing by the City Commission.
- c. A hearing may be held by the City Commission to determine whether the accumulation of trash or the growth of weeds or grass has caused the property to become detrimental to the health, benefit, and welfare of the public and the community or a hazard to traffic, or creates a fire hazard to the danger of property;

Section 14-14. Entry and Lien.

Upon a finding that the condition of the property constitutes a detriment or hazard, and that the property would be benefited by the removal of such conditions, the agents of the City are granted the right of entry on the property for the removal of trash, mowing of weeds or grass, and performance of the necessary duties as a governmental function of the City. Article 7. Juvenile Crime Act

Section 15-89. Purpose; Definitions.

The purpose is to curb the increasing problem of juvenile crime; to educate and reform juvenile offenders; to punish juvenile offenders; and to create an environment whereby adults and juveniles take responsibility for the actions of juveniles. It is intended to hold neglectful or careless parents to a reasonable community standard of parental responsibility through an objective test. It shall not be a defense to the commission of any offense that a parent, guardian or any other person whose responsibility it is to exercise control over a minor, was completely unaware or indifferent to the activities, conduct or whereabouts of such minor.

1. **Definitions.** For the purposes of this Act, the following terms, phrases, words and their derivations shall have the meaning given herein. When not inconsistent with the context, words used in the present tense include the future, words in the plural include the singular and words in the singular include the plural. The word "shall" is always mandatory and not merely directory. The word "may" is always directory and not mandatory.

- a. **Parent.** Any person having legal custody of a minor (i) as a natural or adoptive parent; (ii) as a legal guardian; (iii) as a person who stands in loco parentis; or (iv) as a person to whom legal custody has been given by order of a court.
- b. **Public place in public view.** Any public street, highway, road, alley, parking lot, park, playground, public building, parkway, sidewalk, vacant lot, yard, driveway, automobile or cycle in public view.

- e. **Time of night.** The prevailing local standard of time at the date in question, whether Central Standard Time, or Central Daylight Savings Time, as observed by the public. The time maintained by the Elk City Police Department shall be prima facie evidence of the time of day for continued implementation of this division.
- f. **Years of age.** This term means the time from one birthday, such as seventeenth to the next, but not including the day of the next birthday. Thus upon a person's eighteenth birthday, he or she will cease to be a minor regulated by this ordinance.

Section 15-90. Curfew for Minors.

1. **Curfew for Minors.** It shall be unlawful for any person seventeen (17) years old or younger be or remain in or upon any public place in public view within the City of Elk City between the hours of 11:00 p.m. and 6:00 a.m. Sunday through Thursday and between the hours of 12:00 midnight and 6:00 a.m. Friday and Saturday.

2. **Exceptions.** This section is intended as a clear general guide for minors, their parents, and enforcement officials. In the following exceptional cases, a minor in or upon any public place in public view shall not be deemed in violation of this division:

- a. When the minor is accompanied by his parent.
- b. When exercising First Amendment rights protected by the United States Constitution, such as the free exercise of religion, freedom of speech and the rights of assembly. - c. When engaged in performing an errand or other legitimate business at the direction of a parent including travel to and from such location by a direct route.
- d. When the minor is engaged in employment activities, such as, but not restricted to, newspaper delivery.

- f. Each of the foregoing exceptions are severable and in addition other possible exceptions may be added hereto in the future as warranted by experience as illuminated by the views of student government associations, school personnel, citizens, neighborhood spokesmen, parents, officers and persons in authority concerned positively with minors as well as juvenile delinquency.

3. **Parental responsibility.** It shall be unlawful for a parent knowingly to permit or by insufficient control to allow a minor to be or remain in any public place in public view other than for the exceptions set forth above during curfew hours. The term "knowingly" includes knowledge which a parent should reasonably be expected to have concerning the whereabouts of a minor. It shall be prima facie evidence of violation of this section if a responsible parent has no knowledge of a minors' whereabouts during the hours of curfew established by this division.

4. **Police procedures.** A police officer of the city, upon finding or having attention called to any minor in prima facie violation of the Curfew Ordinance, may take the minor to the city police station, where a parent shall immediately be notified to come for such minor, whereupon the parent may be questioned. This is intended to permit ascertainment, under constitutional safeguards, of relevant facts, and to centralize responsibility in the personnel then on duty for accurate, effective, fair, impartial and uniform enforcement, and recording, thus making available experienced supervisory personnel, the best of facilities and access to information and records. In the absence of convincing evidence such as a birth certificate or driver's license a police officer on the street shall use his best judgment in determining age.

- c. When a parent, immediately called, has come to take charge of the minor, and the appropriate information has been recorded, the minor shall be released to the custody of such parent. If the parent cannot be located, or fails to take charge of the minor, then the minor may be released to the juvenile authorities, except to the extent that in accordance with police regulations, approved in advance by juvenile authorities, the minor may temporarily be entrusted to a relative, neighbor or other person who will on behalf of a parent assume the responsibility of caring for the minor pending the availability or arrival of a parent. However, the police department shall have the discretion to refuse to turn the child over to persons other than natural parents or legal guardians, if circumstances warrant such refusal in their opinion.

5. **Penalty.**

- a. If a parent violates the parental responsibility section, this shall be treated as an offense by the parent. The penalty upon a plea of guilty, nolo contendere, or finding of a guilt shall be a fine of not less than fifty dollars (\$50.00) and not more than two hundred dollars (\$200.00), plus costs, or by imprisonment for not more than thirty (30) days, or by both such fine and imprisonment; and/or parental counseling classes, and/or community service, and/or restitution when damages are a result of/or are involved in the violation.

Section 16-10. Issuance or Refusal of Permit.

1. Each oil and gas permit issued under the terms of this ordinance shall:
 - a. By reference have incorporated therein all the provisions of this ordinance with the same force and effect as if this ordinance were copied verbatim therein;
 - b. By reference have incorporated therein all the provisions of applicable State law and the rules, regulations and standards adopted in accordance therewith relating to the protection of human beings, animals, and natural resources;
 - c. Specify that the term of such permit shall be a period of one (1) year from the date of issuance thereof, and for like periods thereafter upon the inspection and approval of the permittee's well and operations; provided that the term of such permit may be extended for an additional 6 months

upon the request of permittee, approval of the City Commission and the payment to the City of a sum of Two Thousand Five Hundred Dollars (\$2500).

- d. Specify such conditions imposed by the City Manager or his designee as are by this ordinance authorized;
- e. Specify that no actual operations shall be commenced until the permittee shall file and have approved the required bonds and certificate of insurance in the appropriate amounts as provided for elsewhere herein.

2. Upon the consideration of any application for an oil and gas permit required by the terms of this Ordinance, the City Manager or his designee shall recommend approval or disapproval thereof to the Mayor and City Commission, who shall review the matter at a regularly scheduled meeting, and thereupon uphold or reverse the recommendation with or without the addition of any conditions thereto.

3. If the permit is issued, it shall, in two (2) originals, be signed by the City Manager or his designee and the permittee, and when so signed shall constitute the permittee's license to drill and operate in the City and the contractual obligation of the permittee to comply with the terms of such permit, such bonds as are required, and applicable State law, rules regulations, standards and directives. One executed original copy of said permit shall be retained by the City Manager or his designee; and the other shall be retained by the permittee and shall be kept available for inspection by any City or State law enforcement official who shall demand to see same.

4. If the permit is refused, or if the applicant notifies the City Manager or his designee in writing that he does not elect to accept the permit as tendered and wishes to withdraw his application, or if the bonds of the applicant are not approved, then upon the happening of any of said events the cash fee filed with the application shall be refunded to the applicant, except that there shall be retained therefrom by the City the sum of Two Hundred Dollars (\$200.00) as processing fee.

5. If the City Manager or his designee finds that, in his judgment, a hazard to life or natural resources exists, he shall order immediate rectification of the cause. If the permittee takes no immediate measure to reduce the hazard, or if the situation be so perilous as to constitute an imminent threat to safety, then in either of these events, he may order the prompt cessation of activity, and if necessary, the clearance of the premises. If there is no hazard, fire or otherwise, existing, then if the permittee desires, he may continue circulating the hole with drilling fluids in order to protect the drilled hole from being lost.

6. A hearing shall be scheduled before the City Manager within twenty-four (24) hours after the issuance of said order. The City Manager shall determine if proper cause existed, and, if not, shall order the permittee's activity to resume without delay. If the City Manager determines that proper cause did exist for the order to cease activity to be issued, then he shall make whatever ruling is proper to assure rectification of the cause of the peril. Such ruling and

compliance with it by the permittee shall not be construed to absolve the permittee of any liability for any violation of this Chapter or for any damage or injury caused thereby.

7. Any permittee aggrieved by any order, directive or ruling issued by the City Manager or his designee may appeal the same to the City Commission. Such matter shall be placed on the next council agenda for consideration by the City Commission, in accordance with the requirements of the State Open Meeting Act. The lodging of such appeal shall not stay the enforcement of any of the provisions of this Chapter. The City Commission, upon hearing the matter, may issue whatever ruling or order is appropriate.

Section 16-11. Permittee's Insurance and Bonds.

In the event a permit shall be issued by the City, no actual operations shall be commenced until the permittee shall file with the City a site restoration bond and insurance certificates as follows:

1. Permittee shall file with the City certificates of said insurance as stated below, and shall obtain the written approval thereof of the City Manager or his designee who shall act thereon promptly after the date of such filing.

2. Said insurance policy or policies shall not be cancelled without written notice to the City Manager or his designee at least thirty (30) days prior to the effective date of such cancellation. In the event said policy or policies are cancelled, the permit granted shall immediately thereupon terminate without any action on the part of the City Manager or his designee, and permittee's rights to operation under said permit shall cease until permittee files additional insurance as provided herein.

3. A site restoration bond shall be required in the principal amount of Fifty Thousand Dollars (\$50,000.00). Any person who drills or operates any well for the exploration, development or production of oil or gas within this City, shall furnish on forms approved by the City and maintain at all times a blanket site restoration bond or a blanket site restoration irrevocable letter of credit in the principal sum of Fifty Thousand Dollars (\$50,000.00). The bond or letter of credit must be executed by a reliable insurance company or bank authorized to do business in the State of Oklahoma, as surety or creditor, with the permittee as principal or debtor, running to the City for the benefit of the City and all persons concerned, conditioned that the permittee will comply with the terms and conditions of this Chapter in the drilling and operation of all oil or gas wells drilled or operated with the City. The bond or letter of credit must become effective on or before the date same filed with the City and remain in full force and effect for at least twelve (12) months subsequent to the expiration of the permit term, and, in addition, the bond or letter of credit must be conditioned that the permittee must promptly pay all fines, penalties, and other assessments imposed upon the permittee by reason of his breach of any of the terms, provisions or conditions of this Chapter, and that the permittee, after negotiation with the City, will financially support the restoration of the streets, sidewalks and other public property within the City which may be disturbed or damaged during the permittee's operations, to their former condition; and that the permittee must promptly clear all premises of

all litter, trash, waste and other substances, and must, after plugging and abandonment, grade, level and restore said property to the same surface condition, as far as possible, and existed prior to commencing operations; and further that the permittee shall indemnify and hold harmless the city from any and all liability attributable to granting the permit and that the permittee shall promptly pay all sums with respect to deductibles on covered losses under insurance policies required by this Chapter; and that the permittee shall comply with all of the terms of this Chapter concerning the plugging and abandonment of all such wells. Each bond or letter of credit submitted shall cover all wells drilled or operated by said person within the City as specifically described all wells covered by name, legal description, and oil and gas permit number, if any. For good cause shown, the City, after notice to a permittee and opportunity for hearing may require the filing of a blanket bond letter of credit for all wells within the City in an amount higher than Fifty Thousand Dollars (\$50,000.00), but not to exceed One Hundred Thousand Dollars (\$100,000.00). "Good cause" shall include, but shall not be limited to, a showing that the operator or permittee has previously violated the provisions of this Chapter, or that the operator has multiple wells such that in the exercise of ordinary prudence, the City shall require an additional amount.

4. In addition to the bond required in paragraph 3. of this Section, the permittee shall obtain Five Million Dollars (\$5,000,000.00) See page and Pollution Insurance per well for the benefit of the City and all persons concerned, conditioned that the permittee will comply with every applicable Federal and State Law, rules, regulations, standard or directive relating to the maintenance of the safe and beneficial physical, chemical and biological properties of any natural waters of the City; that the permittee shall obtain the necessary permits from the City and State with regard to any operations which have the potential of rendering such waters harmful or detrimental or injurious to the public health, safety and welfare; that the permittee shall bear all the cost necessary and incidental to the correction of any pollution to such waters caused by the permittee or permittee's agents, servants, employees, subcontractors or independent contractors; that the permittee shall pay all fines, penalties, assessments or judgments resulting directly or incidentally from the permittee's activities which result in pollution of City waters; that the permittee shall indemnify and hold harmless the City from any and all liability attributable to granting the permit where such liability results from the pollution of City waters.

5. In addition to the bond and insurance required in paragraphs 3. and 4. of this Section, the permittee shall carry a policy or policies of standard comprehensive public liability insurance, including contractual liability covering bodily injuries and property damage, naming the permittee and the City, issued by an insurer authorized to do business within the State, such policy or policies in the aggregate of Five Million Dollars (\$5,000,000) per occurrence.

Section 16-12. Testing of Water Wells.

Baseline testing of producing fresh water wells within a one thousand foot (1000') radius of a proposed well may be required by City Commission as a provision of the oil and gas permit, upon agreement of the property owner.

Section 16-13. Conversion From Natural or Artificial To Enhanced Recovery.

1. No person shall convert any well from natural or artificial production to a use for enhanced recovery without first obtaining an oil and gas permit.
2. No person shall re-enter any abandoned or plugged and abandoned well or drill an original well to be used for enhanced recovery without first obtaining an oil and gas permit.

Section 16-14. Enhanced Recovery

1. An application for such permit as is required by the preceding section shall be in the same form as that required for a permit to drill an original well, and shall contain complete information required by the City Manager or his designee, including the following:

- a. A map of the well site, showing all equipment to be used there, location of pipelines, access road, and distances from the well to any and all fences, public roadways, and buildings within a radius of one thousand feet (1000');
- b. A map of the project showing: the location of all supply, disposal, injection and producing wells; all conduits; tank battery, pumping station and appurtenant equipment; all other wells in the project area and those located in the sections immediately adjacent to include producing, abandoned, plugged and abandoned, disposal and public or private fresh water supply wells.

2. Upon the completion of the application required hereunder, the City Manager or his designee shall have thirty (30) business days to review same and make a recommendation of approval or disapproval to the Mayor and City Commission.

3. A fee in the sum of One Thousand Dollars (\$1,000.00) shall be submitted along with every application required hereunder.

4. Fresh water wells located within a radius of four hundred feet (400') of any enhanced recovery well shall be tested semi-annually for the presence of deleterious substances, such as chloride, sulphates and dissolved solids. If any enhanced recovery well is in compliance with OCC Rule 3-305, (Testing and Monitoring Requirements for Enhanced Recovery Injection Wells and Disposal Wells), the City Manager or his designee may wave the testing of fresh water wells located within a radius of four hundred feet (400') of the inactive well. Such testing is the responsibility of the permittee and permittee's expense. The City Manager or his designee shall be notified five (5) days in advance of such testing and may be present therefore. Test results shall be filed with the City upon completion.

Section 16-15. Deepening and Sidetracking Wells From Existing Well Bores.

re-entry of a well from an existing well bore is permitted upon proper approval from the

Corporation Commission and requires City Commission approval.

Section 16-16. Annual Fee to Operate.

An annual inspection fee is hereby levied upon each well operated or maintained under a permit issued by the City. Such fee shall be in the amount of Five Hundred Dollars (\$500.00).

Sections 16-17 through 16-24. (Reserved for future use.)

ARTICLE 2. REGULATORY PROVISIONS.

Section 16-25. Compliance With Applicable Laws.

No person shall drill an original well or re-enter an abandoned well or a plugged and abandoned well for any purpose, or allow to exit any well, structure, equipment, pipeline, machinery, tank or other appurtenance, in violation of any of the provisions of this ordinance or other City ordinances as may be applicable, or the laws, rules, regulations, operative standards or directives of the State.

Section 16-26. Well Location.

1. No permit shall be issued for the drilling of an original oil and gas well or the re-entry of an abandoned well or plugged and abandoned well if the well or the exterior of any tank or pressure vessel is nearer than four hundred feet (400') of any residence, commercial building, or producing fresh water well.

2. This four hundred feet (400') separation can be reduced to a three hundred feet (300') separation if written consent from the property owners within the reduced distance has been submitted with the drilling application. The 400' minimum separation from a water well cannot be reduced.

Section 16-27. Streets and Alleys.

No well shall be drilled, and no permit shall be issued for any well to be drilled, at any location which is within any of the streets or alleys of the City; and no street or alley shall be blocked or encumbered or closed in any drilling or production operation except with the written approval of the City Manager his designee, and then only temporarily.

Section 16-28. Movement of Heavy Equipment.

1. Vehicles associated with drilling and/or production in excess of three tons shall be restricted to such streets designated by the City as either truck routes or commercial delivery routes wherever capable of being used. The vehicles shall be operated on a truck route wherever capable of being used; they shall be operated on a commercial delivery route only when it is not possible to use a truck route to fulfill the purpose for which such vehicle is then being operated. Commercial delivery route means any street or highway so designated by the City for the use by

any commercial motor vehicle, truck-tractor, trailer, semi-trailer, or any combination thereof. All vehicle truck routes must be approved by the City Inspector before the oil and gas permit is issued. The City Inspector shall have the authority to require an alternate route to minimize the impact to surrounding uses.

2. No person shall move or cause to be moved, over, upon or across any pavement or paved street, or alley within City limits, any piece of machinery of extreme weight which may crack or injure such pavement, except as herein provided.

Section 16-29. Drilling Operations Equipment.

All drilling, re-entry and operations at any well performed under this ordinance shall be conducted in accordance with the best practices of a reasonably prudent operator. All casing, valve, and blow-out preventers, drilling fluid, tubing, bradenhead, christmas tree and well head connections shall be of a type and quality consistent with and best practices of such reasonably prudent operator. Setting and cementing casing and running drill stem tests shall be performed in a manner and at a time consistent with the best practices of such reasonably prudent operator. Any permittee under this ordinance shall observe and follow the recommendations or regulations of the American Petroleum Institute and the State Corporation Commission.

Section 16-30. Fencing, Screening and Landscaping.

Any person who owns, operates or maintains any producing well shall have the obligation to enclose said well, together with its surface facilities, by a sight restrictive fence sufficiently high and properly built to keep persons and animals out of the enclosure. All gates thereto shall be kept locked when authorized persons are not within the enclosure. Provided, however, that the City Inspector, upon written application by a permittee, may designate a different type of fence to be erected if he determines in a particular case that a sight restrictive fence is not necessary to protect the public health, safety and welfare and that a different type of fence would meet those objectives.

Section 16-31. Work Hours, Noise and Other Nuisances.

1. No construction activities involving excavation of , alteration to, or repair work on any access road or well site shall occur between 9:00 P.M. and 6:00 A.M.. Truck deliveries of equipment and materials associated with drilling and/or production, well servicing, site preparation and other related work conducted on the well site shall be limited to such daytime hours except in cases of fires, blowouts, explosions and any other emergencies or where the delivery of equipment is necessary to prevent the cessation of drilling or production. Mobilization and demobilization and advancing the bore hole shall be allowed on a well site on Sunday.

2. All oil operations shall be conducted in such a manner as to eliminate, as far as practicable, dust, noise, vibration or noxious odors, and shall be in accordance with the best accepted practices incident to exploration for drilling for, and production of hydrocarbon substances. Proven technological improvements in exploration, drilling and production methods

shall be adopted as they become, from time to time, available, if capable of reducing factors of nuisance and annoyance.

Section 16-32. Motive Power.

Motive power for all well pumping equipment shall be electricity; provided however, the City Manager or his designee may vary the requirements thereof to suit the application before him.

Section 16-33. Facilities.

painted Big Elk brown and white and maintained in a good state of appearance and shall have posted in a prominent place as required by the Oklahoma Corporation Commission, a metal sign no less than two square feet in area upon which the following information shall be conspicuous; permittee's name; 24 hour emergency phone number; lease name; and location of the well bore by reference to the United States survey. In the event of a change in operator, it will be the new operator's responsibility to replace the sign within thirty (30) days after the change is effective.

Section 16-34. Derrick and Rig.

City Manager or his designee. The permitting of any drilling rig or derrick to remain on the premises or drilling site for a period longer than sixty (60) days after completion or plugging and abandonment of a well is hereby prohibited, unless an extension is granted by the City Manager or his designee.

Section 16-35. Reduced Emission.

1. After fracturing or re-fracturing, Operators shall employ appropriated equipment and processes as soon as practicable to minimize natural gas and associated vapor releases to the environment. All salable gas shall be directed to the pipe line as soon as practicable or shut in and conserved. All wells that have a pipe line shall be required to employ reduced emission completion techniques and methods, but Operators may request a variance from the City Inspector if they believe that reduced emission completion techniques or methods are not feasible or would endanger the safety of personnel or the public.

2. Flaring shall be required in some instances as an alternative to venting. If burning of gases by open flame is authorized by the City Inspector then such open flame shall not be located closer than four hundred (400') feet from any building not used in operations on the drilling site and such open flame shall be constructed in such a way as to minimize detrimental effects to adjacent property owners. Site plan showing the location of the flare shall be on file with the Fire Department prior to placement of the flare.

Section 16-36. Fire Prevention.

, including foam producing chemicals of a particular kind and amount, as approved by the City Fire Department shall be maintained on the drilling site at all times during drilling and hydraulic

fracturing operations. All machinery, equipment and installations on all drilling sites within the City Limits shall conform with such requirements as may from time to time be issued by the City Fire Department. Windssocks will be installed on any drilling location or loading site.

Section 16-37. Storage Tanks and Separators.

1. Storage tanks shall be constructed, operated and used in such manner as to protect the health, safety, and general welfare of the public. Storage tanks shall be vapor tight with a vapor recovery system and built to minimize size within state approved safety guidelines. Tank battery facilities shall be equipped with static electricity and lighting arrestor systems.

2. A permittee may use, construct and operate a steel conventional separator and such other steel tanks and appurtenances as are necessary for separating or treating oil or condensate with each of such facilities to be so constructed and maintained as to be vapor tight with a vapor recovery system. Each oil, gas separator shall be equipped with both a regulation pressure-relief safety valve and a bursting head. Site plan shall be on file with the Fire Department prior to placement of such equipment.

3. There shall be a minimum separation distance of at least twenty-five feet (25') between storage tanks (crude and water) and heater treaters or other equipment designed to be heated with burners or electric elements. The provisions of this subsection shall apply only to tanks or equipment installed, placed or replaced.

4. One hundred twenty days (120) after completion of the well, the tank battery, diking, fencing, and other surface equipment must be installed. Site plan shall be on file with the Fire Department prior to placement of such equipment.

Section 16-38. Impounding Around Tanks by Diking.

1. A slope of not less than one percent (1%) away from the tank shall be provided for at least fifty feet (50') or to the dike base, whichever is less.

2. The volumetric capacity of the dike area shall not be less than the greatest amount of liquid that can be released from the largest tank within the diked area, assuming a full tank. To allow for volume occupied by tanks, the capacity of the diked area enclosing more than one tank shall be calculated after deducting the volume of the tanks, other than the largest tank, below the height of the dike.

3. To permit access, the outside base of the dike at ground level shall be no closer than ten feet (10') to any property line that is or can be built upon.

4. Walls of the diked area shall be of earth, steel, concrete or solid masonry designed to be liquid tight and to withstand a fully hydrostatic head. Earthen walls three feet (3') or more in height shall have a flat section at the top not less than two feet (2') wide. The slope of an earthen wall shall be consistent with the angle of repose of the material of which the wall is constructed. Dike areas for tanks containing Class 1 Liquids located in extremely porous soils

may require special treatment to prevent seepage of hazardous quantities of liquids to low-lying areas or waterways in case of spills.

5. A dike shall also be constructed to separate the crude storage tanks and water storage tanks from separators, heater treaters, and other vessels. The height of this dike shall meet the requirements specified above. The provisions of this subsection shall apply only to tanks or equipment installed, placed or replaced on or after the effective date of the ordinance by which this subsection was enacted.

6. Where provision is made for draining water from diked areas, such drains shall be controlled in a manner so as to prevent flammable or combustible liquids from entering natural water courses, public sewers, or public drains, if their presence would constitute a hazard. Control of drainage shall be accessible under fire conditions from outside the dike.

Section 16-39. Pits.

from the premises and the drilling site within sixty (60) days after completion of the well. No earthen pits shall be allowed. If the provider fails to remove the facility within the required time, the facility shall be deemed abandoned. The City shall have the authority to enter the premises and remove the abandoned facilities. All costs of removal that exceed the amount of the bond or security posted for that purpose shall be collected from the provider or property owner in the manner provided for summary abatement of nuisances. This requirement shall apply to collocated facilities unless the collocation agreement provides for the removal of abandoned facilities by the tower operator.

2. DEFECTIVE FACILITIES. Defective or unsafe antennas, telecommunications facilities shall be repaired or removed within three months at the owner or operator=s expense. If not removed, the City may remove at the expense of the owner or operator.
